FairForge-2 public: interim validation, seed 17

All values below are 100× native fractions. Each method uses one AUC-selected checkpoint. BCE: selected epoch40, 49/50 completed; DAG-FDD: selected epoch50, 50/50 completed; DAW-FDD: selected epoch41, 50/50 completed. No TEST results. Global validation calibration targets10% FPR; achieved9.967%.
